Newark, DE 19711

Dear ██████████, MD:

Allow this letter to introduce **Nature's Way Medicine** and how its services may be beneficial to healthcare providers.

Medical marijuana is legal in Delaware. This is now both fact and a hot topic amongst patients requesting physicians to sign their medical marijuana card applications and verify the necessary paperwork and qualifications set by Delaware's Medical Marijuana Program.

I'm Matt Roman, MD and my purpose is to set an example for physicians uncomfortable verifying patients for medical marijuana while it remains Schedule I, federally illegal and professionally taboo. As an expert in the field, my service is in-depth consultations meeting the highest standards for any consultant. Both my primary care patients and marijuana referrals are equally cared for. Regular communication and personal meetings with the Marijuana Program's staff in Dover ensures their requests are met while adjustments to their policies are fine-tuned.

Joining the practice is *a psychiatrist specifically for PTSD treatment.* He will be the first in DE to specialize in PTSD treatment with medical marijuana, which requires a psychiatrist's assessment and approval. The clinic is also actively enrolling patients for monitoring and data collection to better understand or disprove treatment risks and benefits.

[REDACTED], MD

We are happy to assist your patients' requests and offer them the services that many practitioners (or their employers) prefer abstaining from in the current sociopolitical environment. Attention to the intricacies of even the most complex cases is assisted by medical records faxed to the clinic. If you feel a patient may benefit, we can assess this and make it happen, freeing you of verification faxes and re-approvals each year.

Please contact me for any questions or concerns. My direct toll-free cell phone ("bat phone") is (84) 420-ROMAN. Please do not share this number since it is exclusive to physicians.

Your participation verifying patients for medical marijuana is strongly encouraged. However, consider **Nature's Way Medicine** for expert consultation referrals. Your patients will be grateful. See our online reviews and our website's blog to follow the rapidly-changing social norms affecting state and federal laws.

We wish you and your family, colleagues and patients a successful 2016.

Sincerely,

Matthew A. Roman, MD
President, Founder & Physician
